Project Title: Olivie Blake Website

I'd like to build this site as multiple pages, rather than a long, single page website. I think a simple top navigation bar would work nicely to bring the user to different pages.

- **Home Page/Introduction** – Introduce Olivie Blake as an author and her impact/ influence on the literary community

- **Personal life + the backstory behind her pen name** – where she went to university/ educational background, where she is from and her current status

- **Career –** would highlight the evolution of her career from her first book published to now. There can be a section about the awards shes been nominated for and/or won

- **Works –** a page to honor and highlight all of her works published across the years

- **Extras (optional?) –** maybe I could include a page that includes a few of her blog posts and additional works that are featured on her website, as well as reviews/praise from other popular authors within the genre

- **Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
